

THE AGAPE RINGERS

VENUE SPECIFICATIONS

SPACE

PERFORMANCE SPACE

Our minimum space is **24' wide x 15' deep, with a 2' aisle on each side.**

We provide our own tables (with adjustable height legs) and our preferred configuration is two rows with a minimum of 3' behind each row:

- Front row: **24' long x 3' deep**
- Back row: **18' long x 9' deep.** We set up bass Choirchimes parallel with this row in addition to the bell tables.

If possible, we prefer that the rows be on two levels, with the upper level **2" to 3' higher** than the lower level.

We often utilize piano or keyboard in our concerts, and that instrument would need to be adjacent to but not in the above mentioned space.

STORAGE

We request a storage area for bell cases during the performance.

DRESSING ROOMS

We request two dressing rooms (1 male, 1 female). We prefer that these rooms be able to be locked during the performance.

ACCESS

We need access to the performance site **3 hours** prior to the performance time for set up and rehearsal. We also need access to the performance site for **1 hour** after the conclusion of the performance for tear down and loading. *House doors shall open no sooner than **30 minutes** prior to performance time.*

EQUIPMENT AND OTHER

- 24' of table for product sales and organization information
- Microphone for director
- 5 standard black orchestral music stands
- Piano - properly tuned
- Minimum of 2 ushers to hand out programs and count and report attendance total
